CAREER SUMMARY

Career Objective Dedicated and results-oriented Information Technology graduate with expertise in programming, database management, computer networks, operating systems, cloud technologies, and technical support. Passionate about leveraging analytical thinking and technical proficiency to develop efficient, scalable, and secure IT solutions. Eager to join a forward-thinking organization where I can contribute to business objectives, embrace emerging technologies, and build a successful career in IT Operations, System Administration, Software Development, or Data Analytics.

PROFESSIONAL EXPERIENCE

Apex Kidney Care Pvt LTD, Bhopal

Executive ADMIN (Feb 2026 - June 2026)

- Overseeing administrative operations and daily center activities.
- Managing executive schedules, meetings, correspondence, and documentation.
- Coordinating with departments to ensure smooth operational workflows.
- Supporting hospital administration processes with confidentiality and professionalism.
- Contributing to efficient administrative systems that enhance patient care quality.

Bansal Hospital, Bhopal

Executive (Feb 2024 - Dec 2025)

- Provided training to staff on new systems and technologies with ongoing support.
- Handled inbound and outbound calls and transferred them to relevant departments.
- Assessed technical issues, analyzed data, and developed strategic solutions.
- Fostered healthy relationships between clients and customers. Managed and coordinated a team of 13 employees in the quality control department

PROJECTS

Face Recognition Based Attendance System

Tech Stack: Python, OpenCV, LBPH Face Recognizer, MySQL

- Developed an automated face recognition-based attendance system using Python and OpenCV, achieving 96% recognition accuracy.
- Implemented face detection and recognition using the Haar Cascade Classifier and LBPH algorithm for real-time attendance marking.
- Integrated a MySQL database to securely manage student records and attendance logs, reducing manual record-keeping efforts.
- Optimized image preprocessing and recognition workflows to improve system performance and ensure reliable attendance tracking.
